- Brand: Samsung
- Size: 1GB
- 184-pin DIMM
- DDR PC3200
- Data Rate = 400MHz
- CAS: 3.0
- Low Noise 6-Layer PCB
- Meets or Exceeds Apple Specifications
- Also supports PC200 CAS 2.0, PC2100 CAS 2.0 or 2.5 operation, PC2700 CAS 2.5 operation.
- Fully compliant with JEDEC specifications

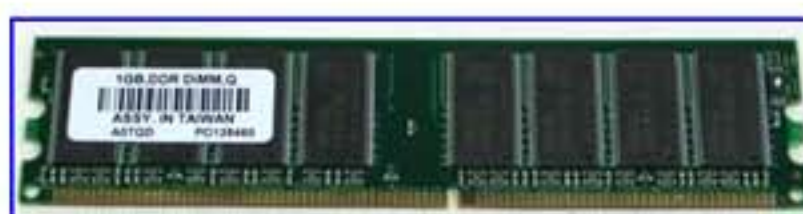

DDR SDRAM (double-data-rate synchronous dynamic random access memory) is a type of memory integrated circuit used in computers. It achieves greater bandwidth than ordinary SDRAM by transferring data on both the rising and falling edges of the clock signal (double pumped). This effectively nearly doubles the transfer rate without increasing the frequency of the front side bus.

This DDR RAM is Low Density and suitable for any PC Configuration and motherboard. The Low Density guarantees that it will be compatible in your PC !

Following are the specifications for this DDR RAM:

- 1 GB (1024 MB) module (not 2x512MB modules)
- DDR RAM (Double Data Rate Random Access Memory)
- DIMM (Dual In-line Memory Module)
- Double sided
- 184 Pin, Gold Contacts
- True PC3200 400Mhz
- Backward compatible with PC3200, PC3000, PC2700, PC2400, PC2100, PC1600
- CAS 3 (will work in all DDR systems)
- Made with 64Mx8 Low Density Chips
- Non-ECC (Non-Error Correction Code)
- This DDR RAM is Non-REGISTERED (Registered RAM is only for servers)
- This DDR RAM is Unbuffered (Buffered RAM is only for servers)

To get the best deal for our customers we have purchased ram in bulk from the largest distributor in the United States. These modules were taken from computers being updated and were verified working at the time of the upgrade. However, we have not tested these modules and are offering them as "as-is, where-is" with no returns, guarantees, or claims as to working condition.
